Free providers (Gmail, Yahoo, etc.) are not accepted for business accounts.

Once your profile is ready, its status will change to “Pending”. A member of our team will review and approve it—this usually takes a few minutes, but can take up to 2 business days.

 Pending Review

We're verifying your account. This usually takes 1-2 business days.

While we review and approve your profile, you can already post a job or search for welders using the menu on the left.

When creating a job post, make sure to enter the exact postcode where the work will take place. If you are looking for workshop work, use your business or personal postcode. This allows welders to see how far they need to travel and calculate their costs accurately for the project.

Connecting & Taking Action:

When you find a welder or employer that matches your requirements, you can message them directly through the platform to get in touch and discuss project details.

WHY MYWELDER WAS CREATED & OUR MISSION

MyWelder was created out of a real need in the industry. As a welder myself, I know firsthand the challenges skilled workers face in finding consistent projects, and how time-consuming it is for companies and clients to locate reliable, qualified welding contractors without paying steep middleman fees.

Our goal is to build a strong, transparent, and dedicated community for the welding sector. We want to cut out the agencies, empower skilled welders to showcase their work directly, and help businesses find local talent quickly and effortlessly. MyWelder is built by a welder, for the welding community, and we are committed to continually improving it together with you!
